Correction to “Preferential Photooxidation of CO in Hydrogen across the Crystalline Face Boundary over Spheroidal ZnO Promoted by Cu Ions”

Yusuke Yoshida, Takaomi Itoi, and Yasuo Izumi*

J. Phys. Chem. C 2015, 119 (37), 21585−21598. DOI: 10.1021/acs.jpcc.5b07240

Page 21592. In Table 3 in our paper,1 the reaction time was incorrect, and a part of the reactant pressure was not noted. In the caption, "Photo-PROX Reactions" were for 3 h, not 55 min. The reactant pressure was H₂ 6.4 kPa, CO 64 Pa, and O₂ 76 Pa, as noted in the footnote a. Also in the caption, "the Reduction Rates of Cu Ion Sites" were for 55 min of reaction, and the reactant pressure was H₂ 4.5 kPa, CO 46 Pa, and O₂ 92 Pa, that were not noted in Table 3 in our paper.1 This erratum does not affect any discussion and conclusions reported in the paper; however, this correction is necessary for comparison of photo-PROX performance data to other papers.
